

✂ *Lacy Tank Top*

by Shannon Dennis

materials needed

- 1 tank top
- Iris Embroidery Thread in a color that matches your tank top
- Woven water soluble stabilizer – such as Aqua Magic
- Organza or netting – optional, see how-to video for details
- Embroidery machine
- Lace embroidery design of your choosing
- Sharp, pointed scissors

instructions

1. Send your lace embroidery design to your embroidery machine. Thread your machine with Iris Embroidery Thread™ in the top and bobbin of your machine.
2. Hoop two layers of woven water soluble stabilizer and one layer of organza or netting if needed.
3. Embroider your lace designs. If you used netting or organza, while your design is still hooped, cut away the organza or netting from the design using your sharp, pointed scissors.
4. Follow the manufacturer's instructions to dissolve the stabilizer from your lace completely. Use a towel to dry the lace the best you can then let the lace dry on a flat surface.
5. Once the lace is dry hand or machine stitch the lace in place along the neckline of your tank top. Add crystals or decorative stitching for more texture or interest!
